[redacted] Forms Management

Forms 12c and 53b

You have been holding these 2 forms for about one month to determine if the carbons would age enough to make the hectograph masters reproduce properly. On 13 June 1962, the manufacturer and I tested these forms and I decided the following:

(1) Form 53b is OK. The carbons <sup>have</sup> improved and the form should perform satisfactorily.

(2) Form 12c is poor and is rejected. According to [redacted] [redacted] of Procurement the manufacturer will pick up 12c and replace the complete order of some 60,000, 4 part sets.
